

CELL TRANSPLANT SOLUTION (CTS)

Transplantation and Wash Buffer

Pioneering Human Treatments from Human Embryonic Stem Cells

High Quality. Innovative Research Tools.

CELL TRANSPLANT SOLUTION (CTS) is a USP-grade injectable solution that can be used as a cell or tissue washing solution or as a general transplant buffer. It is completely compatible with mammalian physiology and it supports the viability and integrity of cells and tissues.

Quality Tested. Consistent. Reproducible.

CELL TRANSPLANT SOLUTION (CTS) is made from the highest quality, sterile-filtered, USP grade reagents. Manufacturing controls and rigorous testing ensure lot-to-lot consistency and quality. Functional performance is validated for each batch. Tested negative for bacteria and fungi. Can be stored at 2°C to 8°C, in the dark, for up to 6 months.
